

SAFEGUARD AGAINST COVID-19

HOW WE PROTECT CUSTOMERS AND STAFF

WE ARE IN THIS TOGETHER

contact is made prior to visiting site to determine if remote solution is possible

staff stay home if unwell, have traveled out of province or been in contact with a COVID 19 case

technicians attend only one site per day, and travel one per vehicle

masks will be worn onsite - training has taken place on proper and safe use of masks

tools are sanitized with alcohol wipes after each job and are not shared amongst staff

we are equipped with hand sanitizer and practice proper hand hygiene per Health Canada guidelines

we must have 6 feet (2 metres) of distance in all work areas to attend site

jpw systems has worked hard to ensure the safety of our team members and the companies we service. We continue to ensure safe practices adding additional practices to reduce the risk of our team becoming infected with Covid 19 as well as those we work with.

As the environment changes and we learn more, we can assure our Customers that we continue to put in place safety measures as provided by Health Canada and the Workers Safety Board of Ontario.

Each planned service call or installation is reviewed by senior management to ensure the site provides at least 6 feet of distancing and hand washing stations or hand sanitizer is available. Once we are assured of these conditions, we will dispatch our team.

We recognize our business provides security for our customers through door hardware, access control, CCTV and intrusion systems and our goal is to continue to provide these services with enhanced health and safety practices.

We are in this together and appreciate your continued support and business.
